

MAKE THE MOST OF YOUR NEW CNC INVESTMENT

- Fast and accurate parametric design software
- Direct transfer to your machine for manufacture
- Instant pricing and 2D/3D presentations for your clients
- Software includes training and support to get you up and running quickly

POWELL CNC

SALES & SERVICE

Polyboard for Furniture... and StairDesigner

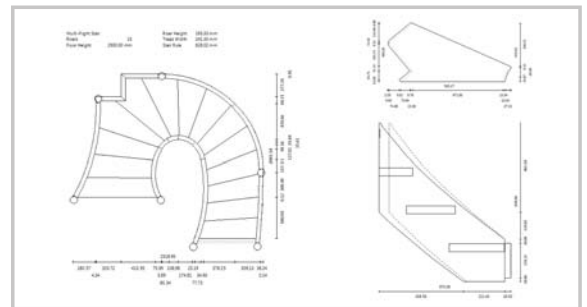

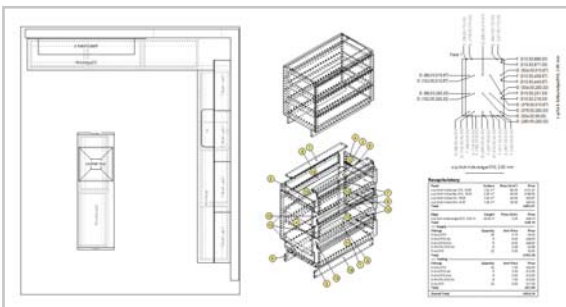

Powerful and easy to use:

- Fully parametric 2D/3D design
- Simple materials based workflow
- Automatic assembly, manufacturing and hardware management

Design any stair in minutes:

- Straight and winders,
- Curved and geometrical stairs
- Rails and banisters
- Wood, cement and metal stairs

Instantaneous working documents:

- 100% accurate project plans
- Plans of each unit and each part
- Cutting and materials lists
- Costs dynamically updated
- Maxicam/Powell CNC ready output

Input dimensions for immediate:

- 2D plans of the stair and all parts
- Real 3D models for verification and client presentations
- Working documents for manufacturing
- DXF files for CNC machining

Seamless integration of your entire design and manufacturing process

Optimisation Add Ons

- Manufacture faster and improve efficiency
- Instant cutting and nesting maps direct to your saw or CNC machine
- Click of a button integration with Polyboard and StairDesigner
- Plus full stock management capabilities

POWELL CNC

SALES & SERVICE

OptiCut

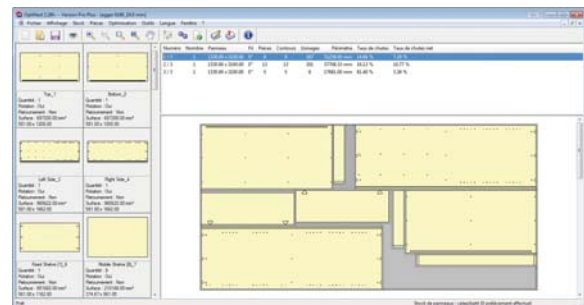

Panel and profile cutting optimization:

- Powerful multi-parameter cutting algorithm
- Sequential cutting maps
- Stock and off-cut management
- Financial and performance reporting

Direct to your Excitech panel or beam saw

OptiNest

True nesting for Maxicam flat bed cncs

- Powerful multi-parameter nesting algorithm
- Nesting maps by panel type
- Stock and off-cut management
- Financial and performance reporting

Direct to your CNC machining centre
